PANKAJ KUMAR BHARTI

Java Developer

Pune, India | +91-7361015626 | rajpankajbharti1802@gmail.com | LinkedIn | GitHub | LeetCode | GeeksforGeeks

Professional Summary

Java Developer experienced in building secure, full-stack applications with **Java**, **Spring Boot**, **React.js**, and **MySQL**. Skilled in **JWT** authentication, real-time systems (**WebSocket**, **Redis**), and writing clean, well-structured code backed by strong **OOP** fundamentals.

Technical Skills

Programming: Java, JavaScript, SQL
Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, JWT
Frontend: React.js, HTML5, CSS3, React Router
Databases & ORM: MySQL, PostgreSQL, Hibernate, JPA
Real-Time & Caching: WebSocket, Redis
Messaging & DevOps: Apache Kafka, Docker
Core Java: OOP, Collections Framework, Exception Handling, Multithreading, Java 8, Stream API
Practices: API Integration, Authentication, Authorization, Request Validation, Debugging
Tools & Additional: Git, GitHub, Postman, Maven, Eclipse, VS Code, Tesseract OCR

Professional Experience

Java Developer - OneNet Solutions Pvt. Ltd., Pune ***March 2026 - Present***

ERP Management System (Repo)

Java, Spring Boot, React.js, REST APIs, MySQL, Git, Postman

- Engineered a **React.js** frontend spanning **6 core modules** (Sales, Purchase, Items, Parties, Payments, Invoicing) for end-to-end ERP workflows.
- Designed and implemented **3 Spring Boot REST API** modules (Sales, Items, Parties) with full **CRUD operations** for core business functions.
- Connected the **React.js** frontend to **Spring Boot** APIs, implementing business logic and request validation across all modules.
- Validated API reliability using **Postman** and resolved integration issues, maintaining version control with **Git** throughout development.

Role-Based Support Desk System (Repo)

Spring Boot, Spring Security, JWT, Redis, WebSocket, React.js

- Architected a role-based **Support Desk System** with **REST APIs**, enabling real-time communication between users and support agents.
- Secured the platform with **JWT**-based authentication and **RBAC** across multiple user roles using **Spring Security**.
- Enabled real-time messaging by integrating **3** technologies - **WebSocket**, **Redis**, and **MySQL** - for reliable message delivery and persistence.
- Delivered a responsive **React.js** interface connected to the **Spring Boot** backend for seamless user interaction.

UTR Extraction from Payment Screenshots (Repo)

Java, Spring Boot, Tesseract OCR, REST APIs

- Built an **OCR**-based application using **Tesseract** to automatically extract **UTR details** from payment screenshots, eliminating manual data entry.
- Exposed **3 REST API** endpoints for image upload, text extraction, and structured data processing.
- Developed validation logic to accurately identify and verify **UTR numbers** from extracted OCR text.

Training

Java Full Stack Development Training - QSpiders, Hadapsar, Pune ***Apr 2025 - Dec 2025***

Hands-on training in Core Java, Spring Boot, Hibernate, JPA, SQL, REST APIs, JavaScript, React.js, HTML5, CSS3

Education

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science ***Graduated 2025***

Datta Meghe Institute of Higher Education and Research | CGPA: 7.1 / 10

Certifications & Awards

- **Data Analytics Certificate** – Coursera (2024): Completed 8 case studies in SQL, data cleaning, and dashboards.
- **Cloud Computing** – NPTEL

Coding Profiles

- **LeetCode:** 153 Problems Solved - Profile
- **GeeksforGeeks:** 137 Problems Solved - Profile
- **Striver's A2Z DSA Sheet:** 150/455 Problems Solved
